PROFESSIONAL SUMMARY

Software Developer with an educational background in Informatics Engineering Education and hands-on experience in developing web-based applications and digital information systems. Experienced in building scalable frontend applications, integrating RESTful APIs, and managing structured data using modern technologies such as JavaScript, React, and Next.js. Demonstrated ability to collaborate in multidisciplinary teams, translate technical and non-technical requirements into functional solutions, and deliver tasks in structured and regulated environments. Possesses strong problem-solving skills, adaptability, and a continuous learning mindset, with particular interest in software development, digital public services, and data-driven systems. Committed to producing clean, maintainable code while supporting organizational goals through reliable and efficient technology solutions.

WORK EXPERIENCE

Software Developer October 2026 - Present

PT. Universal Big Data | Malang

- Developed and maintained scalable web applications using Next.js and React, improving system reliability and overall user experience.
- Built and integrated RESTful APIs with backend services, enabling efficient and secure data-driven workflows.
- Designed reusable UI components and modular architectures, accelerating development time and simplifying long-term maintenance.

Software Developer January 2021 - June 2021

Dinas Komunikasi Informatika dan Statistik Kabupaten Ponorogo | Ponorogo, Indonesia

- Assisted in developing and maintaining web-based information systems, supporting internal digital services and public-facing applications.
- Implemented basic frontend features and UI improvements, enhancing usability and consistency of government web platforms.
- Supported API integration and data handling processes to ensure accurate and reliable information flow between systems.

EDUCATION

Bachelor of Education in Informatics August 2022 - August 2026

Universitas Negeri Malang | Malang, Indonesia | GPA: 3.8/4.0
